

Professional Summary: Experienced **Software Engineer** with **6+ years** in **Java 8, Spring Boot, Microservices, Angular, and React**. Skilled in building secure **REST APIs**, implementing **JWT, Spring Security, and transaction management**. Proficient in **event-driven architecture** using **Kafka**, with hands-on experience in **Saga patterns** (Orchestration & Choreography) and **CQRS**. Strong in **CI/CD, Docker, Kubernetes, and Jenkins**. Worked with top clients like **Barclays, Infosys, IBM, and Accenture** in **Agile** environments.

🎓 Education

Master of Computer Science (IT)

Dr. BAMU University,

Aurangabad | 2014

🏢 Professional Experience

Talent-Player (Payroll) | Client: Infosys | End Client: Barclays

📅 May 2024 – Present

🔧 Java, Spring Boot, react

📝 Developed business banking applications and backend APIs.

Civica, Vadodara (Remote – Pune)

📅 May 2023 – May 2024

🔧 Java, Spring Boot, Angular

📝 Built UI and backend APIs for Australian local government platform.

IBM, Pune (Payroll: Primus Globule)

📅 Dec 2022 – Feb 2023

🔧 Java, Spring Boot, Angular

📝 Developed logistics microservices for Navistar's WMS platform.

Accenture, Pune (Payroll: Primus Globule)

📅 June 2021 – June 2022

🔧 Java, Spring Boot, Angular

📝 Worked on secure microservices and enterprise UI development.

OMVSAB IT Solutions, Pune

📅 Nov 2017 – May 2021

🔧 Java, Spring, JSP, Thymeleaf, Servlet, jQuery, Ajax, Vue.js

📝 End-to-end development of business web applications.

🔧 Technical Skills, Tools & Technologies

💻 **Languages:** Java, Java 8, WebFlux.

🔧 **Frameworks:** Spring Boot, Spring Security, AOP, Spring Data JPA.

🧠 **Frontend:** Angular (RxJS, NgRx), React (Hooks, Context API, Redux).

📊 **Databases:** MySQL, Oracle, Redis.

🔧 **DevOps & Build Tools:** Maven, Git, Jenkins, Docker, Kubernetes.

✅ **Testing:** JUnit, Mockito. 🧪 **IDEs:** STS, IntelliJ IDEA.

🔧 **API Testing:** Postman, Insomnia.

📊 **Monitoring & Logging:** Log4j, Splunk, Putty.

🌐 **Microservices & Event-Driven:** Eureka, Zipkin, Sleuth, Boot Admin

🚀 Career Highlights

🔧 Designed and implemented **RESTful APIs** and **microservices architecture** to build scalable, modular, and loosely coupled systems

💻 Developed and maintained robust enterprise applications using **Java 8, Spring Boot, Spring Security, JMS, AOP, and Angular**.

📊 Leveraged **Spring Data JPA** to enable seamless and optimized interaction with relational databases such as **MySQL**.

🔒 Applied expertise in **transaction management, AOP, Spring Boot profiling, and JWT-based security** to ensure secure and performant software.

🔧 Experienced with **CI/CD pipelines** using **Jenkins, TeamCity, Maven, Git, Docker, and Kubernetes** for automated delivery and deployment.

⚙️ Implemented design patterns like **Singleton, Factory, Builder, and Saga** (orchestration & choreography) with **Kafka** to enable scalable, event-driven microservices.

🔧 Proficient in **high-level and low-level system design** for scalable, enterprise-ready applications

☁ Configured and managed **CI/CD pipelines** using **TeamCity**, including automated builds, test execution, and production deployments for microservices-based applications.

⚡ Improved application response time by optimizing **database queries**, minimizing API latency, and **implementing lazy loading** where appropriate.

🕒 **Reduced API response time by 40%** by optimizing service-to-service communication and DB queries
